# INTRODUCTION

# SUSTAINABLE PATH

## 3 STAGES

[ 2012-2015 ]

### FIRST CYCLE THE BEGINNING

During 2011, the development of the Sustainability Strategy began, which was launched in 2012. Goals defined in 2015 were achieved by 93%.

[ 2016- 2020 ]

### SECOND CYCLE CONTRIBUTION TO THE GLOBAL SUSTAINABILITY

In 2015, a new stage begins with more ambitious goals for 2020 and incorporating alignment with the United Nations **Sustainable Development Goals** . Defined goals for 2015 were achieved by 95%.

[ 2021- 2025 ]

### THIRD CYCLE UNCORK A FUTURE BETTER

Looking ahead to 2025, the focus on generating positive impacts provided by certification as **Company B** and the strategy generates the so-called “Uncork a Better Future”

For more than 10 years, Viña Concha y Toro has considered a strategic perspective in the management of sustainability, guided by a mobilizing and impactful vision.

Initially, **giving back in each bottle what the earth has given us**, giving thanks for the generosity of the fruits of the earth and our people, for allowing us to prosper. With every step we take, we look for a way to give back.

Today, we want to go further and incorporate into this premise our commitment to **generating net positive impacts**. Leave a legacy in our journey and thus be able to contribute to an inclusive, equitable and regenerative

We want to be a contribution to building a better future for people and the planet. For this reason, we want to extend the invitation to the Corporate Sustainability Strategy 2025 “**Uncork a Better Future**”.

Because the future is forged today, with our daily efforts, with small steps towards greatness, with small efforts that will lead us to be a better company for the world.

# FUNDAMENTAL STATEMENTS

The company seeks to consolidate itself as an international benchmark in sustainability, beyond the limits of our industry.

To do this, we must advance both environmental and social issues, generating virtuous alliances with our interest groups and

standing out for our practices to combat climate change and contribute to the regeneration of our planet.

We hope to leave a legacy of a net positive impact in every area of relationship with our environment and to achieve this challenge, the following elements of sustainable management have been defined .

## MISSION OF SUSTAINABILITY CORPORATE

Generate a net positive impact for our stakeholders and be global leaders in the regeneration of our planet.

*Uncork a Better Future is the name of our 2025 Corporate Sustainability Strategy.*

# STRATEGIC MODEL SUMMARY

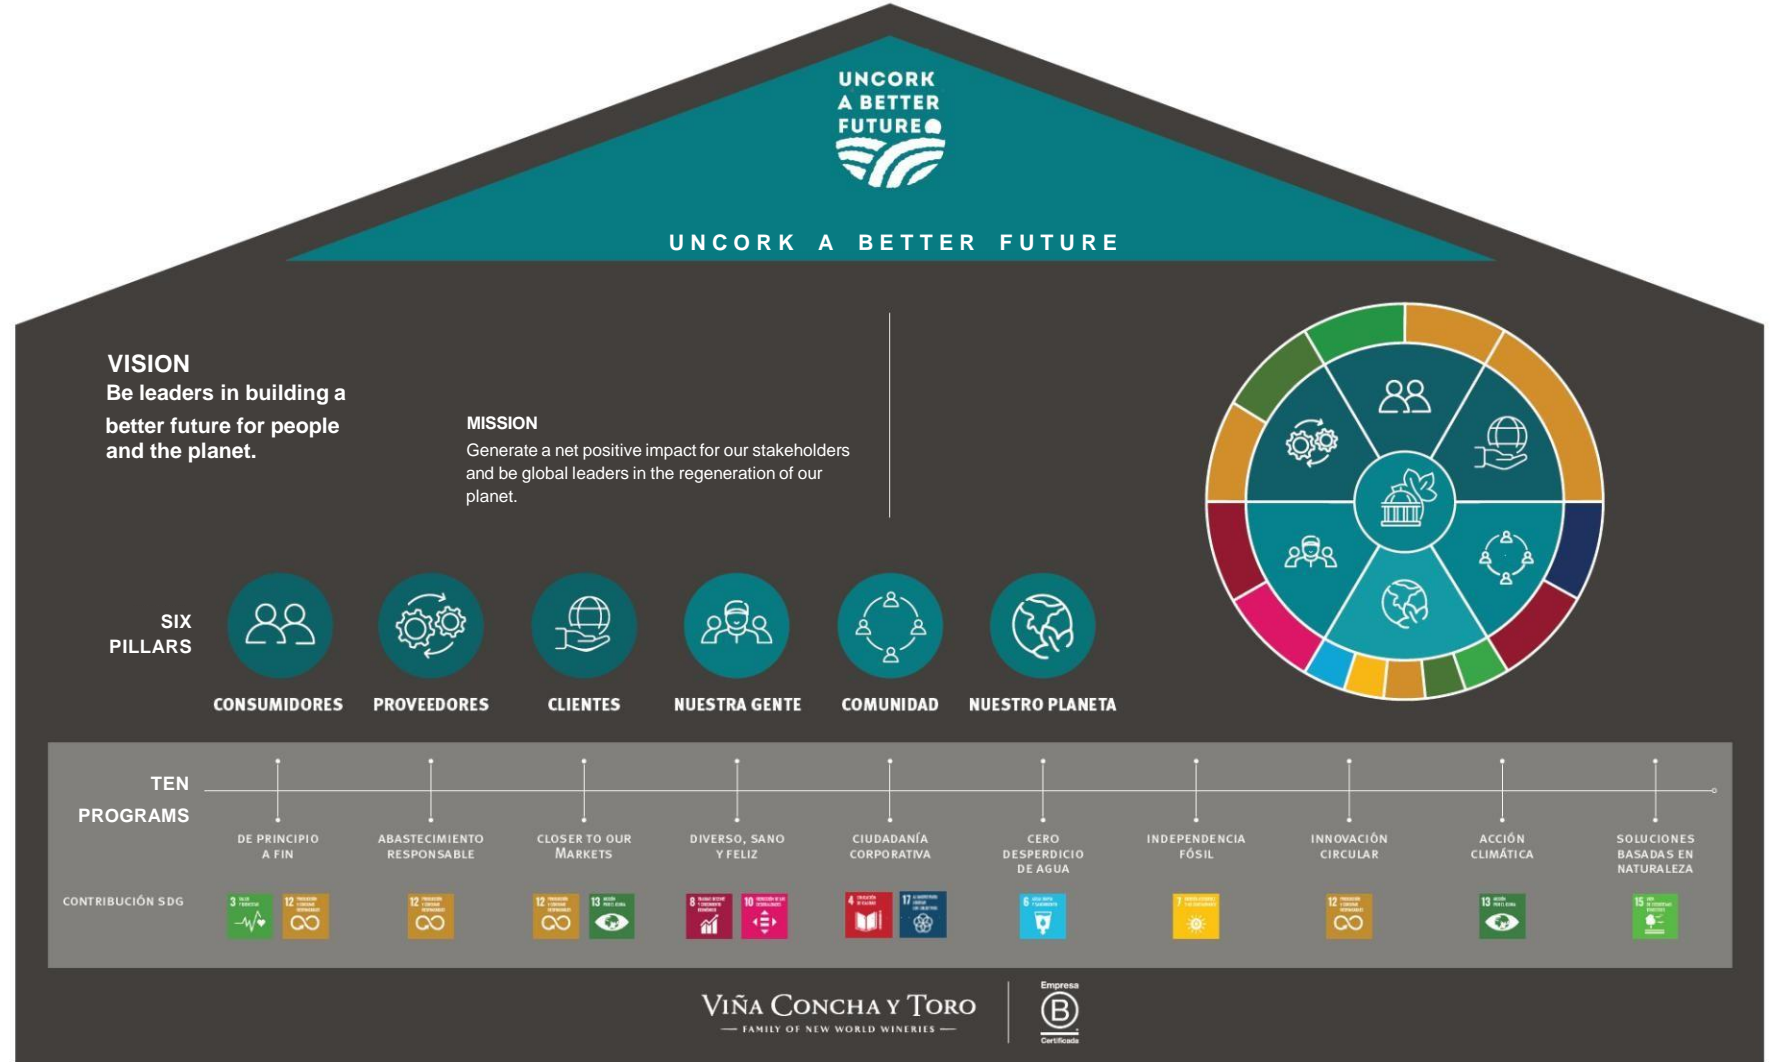

The way to put the vision and mission in sustainability into practice is to focus on generating positive impacts on the main stakeholder groups, which is why the strategy is based on the company's main interest groups in terms of sustainability.

## 6 pillars

They represent the company's main stakeholders, whom we seek to positively impact through defined objectives for 2025.

## 10 programs

Programs in which the effort is focused to generate a positive impact, with goals established for the long term.

# COMMUNITY PILLAR

02

# PROGRAM CORPORATE CITIZENSHIP

The company seeks to strengthen ties with the communities it integrates, contributing to their development. This refers both to the local communities where we operate through wineries and plants, as well as to the global communities of which we are a part.

We want to be active actors and generate positive impact in the communities we integrate, advancing in 3 lines that were raised as central axes for the company's positive contribution to the around.

The objective is to contribute to generating prosperity in the areas where the company is present. This concept translates into support for local entrepreneurship as the first axis of work and as an economic boost mechanism.

The second refers to the empowerment of the community through the search for virtuous relationships and a third axis of work is through support for education.

These 3 axes of work generate the program that seeks to generate positive impact in our communities.

## CORPORATE OBJECTIVE

Contribute to the development of the different communities where we participate or where we are present, through entrepreneurship, community empowerment and education.

## 2025 GOAL

**100% of the local and global communities** that the company integrates, with initiatives that contribute to entrepreneurship, empowerment and/or education.

2025 Goal  
**100%**  
**Communities**  
With coverage of  
Citizenship Program  
Corporate  
(32 in CHILE)

# EXPECTED IMPACTS

01

## EDUCATION

Thinking about future generations, we contribute to Early Childhood Education for 1,500 children and their families in the main communities of vineyard operation in Chile.

02

## EMPOWERMENT

At the territorial level, we will generate Community Relations projects that seek to empower all the communities where we have a presence.

03

## ENTREPRENEURSHIP

We hope to promote local development through contributing to entrepreneurial initiatives that are generated in our communities.

## CORPORATE CITIZENSHIP

The Corporate Citizenship Program seeks to generate a positive and virtuous relationship with the company's social environment. The aim is to strengthen local **entrepreneurship** as a way to generate support for the economic development of the areas where the company is present.

Through **empowerment** local, the company seeks to generate a positive relationship with the environment by supporting communities in their needs to support education, environmental awareness and recreation.

The focus of support for **education** is at the early levels, where the company can contribute to generating changes in the children of the communities.

**TARGET 4-2**

**EQUAL ACCESS TO QUALITY PRE-PRIMARY EDUCATION**

**QUALITY EDUCATION**

**GOAL 4.2**  
By 2030, ensure that all girls and boys have access to quality early childhood development and care services and pre-school education, so that they are prepared for primary education.

**TARGET 17-6**

**KNOWLEDGE SHARING AND COOPERATION FOR ACCESS TO SCIENCE, TECHNOLOGY AND INNOVATION**

**ALLIANCES TO ACHIEVE THE OBJECTIVES**

**GOAL 17.6**  
Improve cooperation and triangulation in science, technology and innovation and access to them, and increase knowledge sharing on mutually agreed terms, including by improving coordination between existing mechanisms.

### 2025 IMPACT

**1,545**  
**Children**  
Benefited by actions in early childhood

### 2025 IMPACT

**32**  
**communes in Chile**  
with social empowerment initiatives

# CORPORATE CITIZENSHIP PROGRAM

KEY  
ELEMENTS

# 01 EDUCATION

In 2021, Viña Concha y Toro entered into an alliance with Fundación Choshuenco to support early childhood in the communities where we are present.

The Program will last 3 years and will benefit 1,545 children and their families in the communities of Puente Alto, Pirque, Chimbarongo and Lontué

## CHOSHUENCO FOUNDATION

It is a non-profit foundation that wants to contribute to the comprehensive education of boys and girls, through the management of high-quality Educational Centers, and continuous training programs to strengthen kindergarten pedagogical teams and parenting skills of the families of the children.

90 hours  
of training Transferred to Gardens

250  
Pedagogical teams contacted

49%  
Full program preview 2022

80%  
of gardens with baseline information

## ALLIANCE FUNCTIONING

The way Fundación Choshuenco operates is through the transfer of knowledge to the educators and pedagogical teams of the gardens.

During 2022, work was carried out in 3 stages to carry out a Baseline and detailed survey of the facilities defined in the Pedagogical Transfer Program.

Currently, we are present in Pirque, with four kindergartens; Molina with eleven kindergartens; and Colchagua with nine. In total, some 1,545 children from the company's communities are being served.

### Baseline Establishment

Collection of information on the gardens through files that collect various types of information regarding the Educational Center and some of its indicators, which is relevant to the process of implementing the pedagogical transfer (family center) and which will be key to observing and confirming the progress in achieving the objectives that the program proposes

### Information gathering

This instrument allows us to gather information regarding work with families, based on the perception that the educational teams themselves have regarding educational centers.

100

responses received

### Family Survey

It allows us to understand, from the parents' perspective, how they relate to the educational center.

## EMPOWERMENT AND ENTREPRENEURSHIP

The empowerment of local communities is relevant to improve the quality of life of people and guarantee their active participation in making decisions that affect their environment. It is about providing the necessary resources and skills so that communities can strengthen themselves and become active actors in solving their problems and needs.

Through the AEM Program (Agricultural Ecosystem Management), the company seeks to transform the company into an integrated local actor. Although AEM was born with the purpose of recovering the natural ecosystems where our farms are located, it has a social component of Community Relations to connect the communities where the company is present.

In the social axis, we seek to develop activities related to 4 components:

- Environmental Awareness
- Education
- Recreation
- Entrepreneurship

2.078

Entrepreneurship Initiatives

## DISTRIBUTION OF INITIATIVES

Viña Concha y Toro is present in **32 communes in Chile**, where different types of operations are located :

- Agricultural (farms)
- Oenological (winery)
- Packaging (productive plants)
- WTC (corporate offices)

On the map, you can see that we have covered the V region (Valparaíso), specifically Casablanca.

Then advancing through the Metropolitan Region and Sixth Region of Libertador Bernardo O'Higgins, until reaching the VII Region of Maule.

Our greatest activity takes place in the 'O'Higgins Region, covering 4 key communes for our community relations: Litueche, Peumo, Marchigüe and San Vicente Tagua Tagua.

Our goal is to ensure that 100% of the communities where we operate have some social initiative implemented.

Currently, community empowerment initiatives have been developed in **9 communes**, which is equivalent to **28%** progress.

28%

Communes where Concha y Toro operates already have initiatives related to their community

9

Communes Involved in 2022

## 2.1 ENVIRONMENT AWARENESS

Each of our actions is carried out by raising awareness about the importance of caring for and protecting the spaces that surround us. For this reason, during 2022 various activities focused on generating environmental awareness in our estates and facilities were carried out:

### FOREST CARE TRAINING UNDER THE FOREST STEWARDSHIP COUNCIL® (FSC)

Our fields are home to 4.272 hectares of native forest certified under the Forest Stewardship Council® (FSC) standard that considers sustainable forest management and the conservation of the Chilean native forest.

During 2022, environmental education talks were held for the communities and neighbors of the Requinoa, El Estero, Rucahue, Idahue, Las Mercedes, Peumo, Ucúquer, Santa Raquel and Palo Santo farms. The training was mainly about native forest care, framed in the FSC® Certification,

which seeks to restore and improve the forest and native scrub structures present on the properties for the provision of Ecosystem Services, considering the traditional rights and well-being of the local community.

Additionally, this training seeks to raise awareness among our communities about the importance of forests for the care and protection of the biodiversity of flora and fauna species and how the forest is a central ally in the fight against climate change given its ability to capture the CO2 from the atmosphere.

The commitment of agricultural management as the guardians and active protectors of the forest stands out, since it provides us with Ecosystem Services such as the regulation of water cycles and protection against erosion.

4.272  
Ha FSC certified native forest

9  
Farms with communities trained in forest care

## TRAINING ON NATIVE FOREST REGENERATION AND FIRE PREVENTION (CONAF)

Within the framework of the Mediterranean Native Forest Conservation Program, in 2019 a Strategic Alliance was established with the National Forestry Corporation of Chile (CONAF) which seeks to protect and regenerate forests. In this context, talks were held in 9 fields, including own workers, neighbors and other interested parties. A total of 165 people were trained during 2022.

On the other hand, a seed collection workshop was held on the ground with staff from Viña Concha y Toro at the Villa Alegre Farm, which has 304 hectares of native forest of native trees to support the propagation of native trees together with CONAF.

In addition, a training workshop on native plant production and field restoration was held by CONAF professionals for the staff of the Rauquén nursery and collaborators of Viña Concha y Toro.

In addition, a training workshop on Law No. 20.283 (Native Forest) is held by CONAF in the Maule region (erosion).

On the other hand, brochures on forest fire prevention were prepared and distributed, in addition to installing signs and digital forest fire prevention signage material .

Together with the National Forestry Corporation - CONAF, Viña Concha y Toro trains its communities to prevent the generation of forest fires in Chile.

During 2022, this activity was carried out in 9 farms in the central area of the country (VI and VII Regions)

165  
Trained people

### CAMPAIGN TRAINING REUSE HEADQUARTERS

Within the framework of Recycling Day, Viña Concha y Toro participated in the “Reuse” campaign of Entel and Kyklos, Company B that seeks to reduce the digital divide in children and adolescents by recovering disused electronic devices to recondition them and donate them to educational institutions that they need it.

The initiative was promoted by the Sustainability Management and the Information Technology Management, who collected computers, notebooks, tablets, accessories and cell phones for repair and subsequent recycling and reuse by vulnerable schools.

This initiative helps us connect and strengthen ties with our community, in addition to contributing to the collective benefit and care of the environment.

### AGREEMENT OF CLEAN PRODUCTION CASABLANCA VALLEY

Viña Concha y Toro signed an agreement that seeks to implement actions that contribute to mitigating the impacts of climate change and safeguarding the sustainability of the Casablanca Valley wine sector and, together with this, achieving greater efficiency in the use of resources.

In addition to Viña Concha y Toro, 20 companies belonging to the Association of Wine Entrepreneurs of the Casablanca Valley (AEVC) signed the Clean Production Agreement (CPA) with the Sustainability and Climate Change Agency.

Through participation in this Agreement for the Sustainability of the Casablanca Valley, we hope to strengthen ties with the wine sector of this emblematic valley.

Through our participation we hope to integrate into the local wine community to ensure that Casablanca becomes the first “sustainable valley in the country”, which represents the ambition of this local project.

**INITIATIVE**  
**"HANDS TO THE EARTH"**  
**UCUQUER**

The "Hands to Earth" program seeks to have various company teams participate in the planting of native trees in the fields of Viña Concha y Toro in Chile, making all areas participate in achieving reforestation goals .

The activity coincided with the celebration of Forest Week, organized by Forest Stewardship Council® (FSC®), international standard under which Viña Concha y Toro certified its sustainable forest management and conservation of the Chilean native forest.

The VCT Chile team, a distribution and marketing subsidiary in Chile, held a native forestry day on the Ucuquer farm, located in the VI Region, where 35 people participated by taking their hands to the earth to plant 150 quillay trees.

This was the complement to a day where the team was able to get to know the icon farm of the Gran Reserva brand.

On the other hand, the Finance Management also participated in the "Hands to Earth" Program, who planted 150 quillayes in the Quinta Maipo Farm.

The activity consisted of planting native trees in a participatory format with the objective that people from an area of the company experience a day of joint work and, at the same time, collaborate with the company's sustainability strategy, which seeks to protect the native forest and its diversity of flora and fauna.

In Chile, the company protects 4,272 hectares of native forest, which the company is regenerating through the participation of collaborators and the community.

## 2.2 EDUCATION

Environmental education is a critical tool in our quest to achieve a more sustainable society and protect our planet

For this reason, during 2022 various activities focused on environmental education and teaching purposes were carried out on our estates and facilities:

### REUSE CAMPAIGN TRAINING VILLA ALEGRE

After the native park project carried out in this school in mid-2021, and seeking to cultivate a long-term relationship with the community surrounding its farms, the delivery of 24 reused equipment is being carried out, enabled to fulfill a new useful life and thus supporting the children of this educational community.

During 2022, 24 computers were delivered to the José Miguel Carrera School, adjacent to our Villa Alegre vineyard. It is expected to continue permanently delving into environmental issues such as the recycling of Electronic Devices and their correct disposal and end of useful life.

### VISITS TO OUR NATIVE FOREST IDAHUE AND RAUCO

Native forests are vital ecosystems for ecological balance and the maintenance of the water and air cycle. Likewise, these forests are carbon sinks, helping to combat climate change. In rural areas, forests also play an important role in terms of recreation and family activities, as well as to carry out educational activities regarding the value of nature conservation and the species of Chilean forests.

During 2022, various visits were made to educational institutions in the Idahue and Rauco Farms, such as the San Alberto School, the Santo Tomás Institute and the Catholic University. Visits to the native forest open the opportunity for children and students to learn to value nature and wildlife. Forests are home to a diversity of living things, from plants and trees to animals and microorganisms.

24

5

Visits of Institutions Educational to the forests of Viña Concha y Toro

## CHRISTMAS WITH MEANING CASABLANCA AND SANTIAGO

During December, this initiative was carried out that seeks to share the magic of Christmas with kindergarten children through gifts donated by company workers.

"Christmas with Meaning" is an initiative in which Viña Concha y Toro invites workers at the sites where we have operations to be part of the magic of Christmas, sponsoring a boy or girl with a Christmas gift.

This year, the gift giving took place at the Valle de Alberto de Casablanca kindergarten, led by the agricultural area of the El Triángulo farm, and at the Ángel de la Guarda kindergarten, located in San Ramón, of the Choshuenco Foundation, an institution that in alliance with Viña Concha y Toro, it provides quality preschool education in vulnerable social environments in the places where the company is present.

## 2.3 RECREATION

Recreational activities are important for the quality of life of the people and the communities where we are located.

This is why we want to promote this type of activities, which seek to share good moments and create memorable experiences. Some of the main activities carried out during 2022 will be mentioned below.

### KAYAKI COMPETITION LA PALMILLA DAM RAUCO

As part of its relationship with its communities, Viña Concha y Toro facilitated this outdoor activity, which was attended by nearly 100 people.

Kayaking is a water sport, in which you sit facing the front (bow), in the direction of travel. It is paddled in a kayak, and it moves through the water with the help of the paddle.

The kayak is a relatively light boat made of plastic, fiberglass, Kevlar, etc. The paddle of a kayak is double-bladed, and is not fixed to the kayak as is usually the case in the paddle sport.

The activity took place at the La Palmilla dam, owned by Viña Concha y Toro and located in the commune of Rauco, which had the participation of local residents and families, who were able to take part in outdoor activities.

The main activity was a kayaking competition, while the second part of the day was an invitation to the public to a recreational regatta at the dam, outdoors and for the family.

**1<sup>st</sup>**  
Kayaking Competition in irrigation dam "La Palmilla" commune of Rauco

**“RALLY AMONG VINEYARDS”  
COMPETITION  
PEUMO**

As part of its relationship with its communities, Viña Concha y Toro facilitated this outdoor activity, which was attended by nearly 100 people.

In the El Olivar sector, the Second Date of the O'Higgins Regional Championship, the Rally between Viñas, Mountain Bike discipline, an initiative that had a great turnout, with nearly 300 competitors from different parts of the country, who came to be part of this extreme and adventurous sports day that consisted of medium and expert challenges.

It was a really fun competition where everyone could enjoy. We will continue to support this type of sports activities.

**LIEBRADA FESTIVAL  
IN MARCHIGÜE**

As part of its heritage, for more than 60 years in Marchigüe the community has celebrated the Liebrada festival, a traditional free-range hunting festival by greyhound dogs in the peasant vineyards. One of these vineyards belongs to the Palo Santo Estate, property of Viña Concha y Toro.

The hare hunts are hare hunts with greyhound dogs over open hills and local vineyards, traditional to the area, where people from all over the country and the surroundings of Marchigüe participate as a gathering at the end of the hunting season.

Then in the media luna the traditional festival is celebrated every August 15, with typical dances, folklore, chicha, chacolí, wines, and all the traditional gastronomy of the area, along with greyhound races that are the main attraction of the party, organized by the Victoria de Marchigüe Club.

**300**

## 2.4 ENTREPRENEURSHIP

Viña Concha y Toro seeks to generate instances of cooperation and mutual collaboration through the reuse of materials and upcycling initiatives that belong to local entrepreneurs from the communities where we are present:

### KALEWÜN WINE BOTTLE UPCYCLING SAN VICENTE DE TAGUA TAGUA

Kalewün is a manufacturing company that uses wine bottles to make its glasses in the commune of Peumo. Through a collaborator from the Cachapoal winery, they contact the Oenology Management and a Collaboration Agreement is signed.

For the development of the mutual cooperation agreement, Viña Concha y Toro SA will make bottles available to Kalewün from the physicochemical laboratory of the Cachapoal winery, commune of Peumo.

On the other hand, the entrepreneur was contacted with the areas of

Marketing and some brands so that they can carry out work related to *merchandising* materials together.

### AILEN BARRELS UPCYCLING SANTIAGO

It is a company that is dedicated to the reuse of wine barrels. This is an undertaking that began with the development of a stove that could be enjoyed in safe, practical conditions and that would allow one to contemplate the flame that generated heat in a warm environment.

Then, I expanded the design to other types of products which are made with the remaining material. These products are generated with the idea of creating environments, experiences and conversations around inputs that are used to the maximum by the design, avoiding the waste of materials and the generation of waste.

# 3

Alliances with local entrepreneurs during 2022

The cooperation agreement with Ailen was entered into as part of a pilot plan to generate instances of cooperation and mutual collaboration for the reuse of wine barrels discarded in the Viña Concha y Toro operation.

Ailen will use the barrels for the production of at least 200 decorative products such as the stove, table top, cork guard, candle holder, mirrors, support table, among others. It is expected to be able to support its commercialization through the vineyard tourist centers in Chile.

**EL GASÚ CRAFTSMANSHIP  
FEMALE ENTREPRENEURSHIP WITH  
NATURAL MATERIALS  
PEUMO**

During 2022, the doors at the Idahue Farm will open to the women artisans of the El Gasú company.

This is a local enterprise fully integrated by women from the area, which is dedicated to rescuing the reed to transform it into 100% natural artisanal rustic fabric, thermal par excellence.

The cattail (*Typha angustifolia*) is an aquatic perennial herbaceous plant, from the Cyperaceae family, and it is very easy to find it wild throughout Chile, near water courses, on the edges of ponds, lakes and rivers.

Every year, at the Idahue Farm, the workers of this enterprise are given access so that they can safely collect this plant fiber, extracting it from the wetlands, dams and ditches in the field.

Some of the work they do with the torora are: Perimeter closures, curtains, sunshades, covers for flower pots, pendants, individual containers, fruit baskets, bread baskets. All their work is made to measure and to order.

# MANAGEMENT PROGRESS 2022

## 2022 RESULTS

Progress on  
Corporate Citizenship  
Program 2022

# 100%

In 2022, progress was made in the different lines of work proposed for the Corporate Citizenship Program.

In terms of Education, the first year of operation of the alliance with the Choshuenco Foundation for early childhood began, benefiting 1,545 children during the year (100%).

In Community Empowerment, during the year progress was made in 16 company farms, which began to develop their community initiatives through environmental awareness, education and recreation (100%)

Additionally, during the year we made progress on the proposed goal of promoting local Entrepreneurship as a way to contribute to economic growth in the communities where we are part. During the year, 2 alliances were signed to advance in the manufacture of glass glasses and wooden design products through the recovery of barrels (100%)

# CONCLUSIONS

In 2022, progress was made in the different lines of work proposed for the Corporate Citizenship Program.

With the aim of generating impacts and leaving a positive mark on our communities, The establishment of 18 initiatives was achieved in the communities surrounding the vineyard operations, with direct involvement of our people and more than 2,000 people from the community. These links will continue in the long term and during 2023 new communities will be integrated into this progress.

To date, more than two-thirds of the fields have regular initiatives. It is also notable that during the year 2 alliances were signed to promote entrepreneurship in locations linked to the Cachapal and Chimbarongo wineries.

In terms of education, the first year of operation of the alliance with Fundación Choshuenco began, which generated benefits for more than 1,500 children in this first year.

During 2023, progress will be made in new locations to increase the scope of the program until 2025

## 2023 GOALS

CORPORATE CITIZENSHIP PROGRAM

- 01. Continue work with pedagogical teams through the Choshuenco Foundation. Enable and monitor Family Centers and coordinate corporate volunteers in each territory.
  
- 02. Advance in new locations to increase the scope of the program, achieving 15 new community relations initiatives.
