1 OBJECTIVE

Viña Concha y Toro S.A., to define and disseminate its position regarding biodiversity management and non-deforestation, has prepared this policy.

This policy aims to establish the general framework regarding the care, protection and regeneration of forests, soils and biodiversity that are part of the natural resource heritage present in the company's lands.

2 SCOPE

The scope of this policy is applicable to all areas of Viña Concha y Toro S.A. and its domestic and foreign subsidiaries.

3 DEFINITIONS

Biodiversity: Variability of living organisms from any source, including, among others, terrestrial and marine ecosystems and other aquatic systems, and the ecological complexes of which they are part; includes diversity within species, between species and of ecosystems.

Deforestation: Deforesting, as such, refers to the action of stripping land of its trees and plants. Deforestation is a process originated by human action in the environment and corresponds to activities that do not have permits or management systems.

4 POLICY GUIDELINES

Viña Concha y Toro S.A. and its domestic and foreign subsidiaries declare their firm commitment to the protection of forests and biodiversity contained in the company's land holdings. As a general guideline, all actions or activities involving Nature and Biodiversity must be aligned with the company's corporate sustainability strategy.

- i. Viña Concha y Toro S.A. and its domestic and foreign subsidiaries declare their firm commitment to the protection of forests and biodiversity contained in the company's land holdings. As a general guideline, all actions or activities involving Nature and Biodiversity must be aligned with the company's corporate sustainability strategy.
- ii. As a way of fulfilling the commitment established in the previous point, the company will carry out restoration, maintenance, preservation, conservation and/or protection activities, as appropriate to the condition and need of each area or zone. This shall be carried out jointly with

the agricultural management of each of the respective origins and approved by them, prior to any implementation in the field.

- iii. It is the responsibility of each3 agricultural management to take care of the natural resources in the territories, according to the needs of each zone, area, farm, farm, or field.
- iv. It is the responsibility of the sustainability management to generate and promote instances of participation with other management to integrate the company in activities of regeneration, restoration, conservation and/or preservation, as feasible.
- v. To generate social and environmental benefits, the company establishes the following general guidelines:
 - a. Manage and compensate for the possible negative impacts produced on Nature and Biodiversity, giving priority to nature-based solutions, and encouraging the development of areas of protected species or private conservation.
 - b. Establish and maintain a permanent dialogue with our stakeholders, for the identification and management of Nature and Biodiversity values in our heritage, recognizing their viewpoints and considering their knowledge and experience. their views and taking into account local ecological knowledge.
 - c. Avoid or reduce deforestation of forests and promote these principles in its supply chain.
 - d. To know and evaluate the richness of biodiversity in a systematic, transparent, and timely manner, encouraging scientific knowledge on biodiversity both locally and globally. Promote this knowledge to all personnel working in Viña Concha y Toro.
 - e. Avoid operational activities near sites that contain globally and nationally important biodiversity. Minimize, restore, and compensate when operating in areas close to critical biodiversity and being proactive in disseminating relevant information.
 - f. Avoid establishing new vineyards in areas of high ecological value, which are recognized as such by a competent entity (native vegetation corridors, vegetation islands, living fences with scattered native vegetation, streams with native vegetation or riparian zones)
