

September 8, 2025

To: The Board of Directors of  
Viña Concha y Toro S.A.

We have performed a limited assurance review of the quantification of the greenhouse Gas Emissions Inventory of Viña Concha y Toro S.A, (hereinafter “the Company”) and the wine-growing subsidiaries Concha y Toro, Viña Cono Sur, Trivento Bodegas y Viñedos and Bonterra Organic Estates, prepared in accordance with the provisions of the Greenhouse Gas Protocol Standards, (hereinafter “GHG Protocol”) and Nch ISO-14.064 part 1, (hereinafter “ISO”), for the period from January 1st to December 31st, 2024.

## **Standards and verification processes**

Our responsibility is to express a limited assurance conclusion on the review of the Greenhouse Gas Emissions Inventory quantification for the period between January 1, 2024, and December 31, 2024, prepared in accordance with the GHG Protocol Standard and ISO Standard, based on the procedures we have performed, and the evidence obtained, We conducted our limited assurance review in accordance with the International Standard on Assurance Engagements on Greenhouse Gas Statements (ISAE 3410), issued by the International Auditing and Assurance Standard Board (IAASB), That standard requires that we plan and perform our engagement to obtain limited assurance that the quantification of the Greenhouse Gas Emissions Inventory for the period between January 1, 2024 and December 31, 2024, in accordance with the GHG Protocol Standard and ISO Standard is free from material misstatement.

A limited assurance review involves performing procedures primarily (consisting of making inquiries of management and others within the entity, as appropriate, and applying analytical and other procedures) and evaluate the evidence obtained. The procedures also include the evaluation of the criteria and quantification of the Greenhouse Gas Emissions Inventory for the period between January 1, 2024 and December 31, 2024, in accordance with the GHG Protocol Standard and ISO Standard.

Our review includes the following procedures:

- Meetings with the professionals responsible for the preparation of the Greenhouse Gas Emissions Inventory,
- Receive the calculation Excel file, as well as folders containing information and evidence for each of the scopes,

- Analysis of the emission factors considered by company for calculating the 2024 carbon footprint,
- Review of the consistency of the calculations received for each scope of the Greenhouse Gas Emissions Inventory, these were reviewed through random sampling, and the differences, if any, were clarified with management.

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement, Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

The details of the total emissions reported in the Company's 2024 Corporate Carbon Footprint Report are presented below:

**Carbon Footprint of Viña Concha y Toro S, A., year 2024 - Market Method**

### **Our Independence and Quality Controls**

We have complied with the relevant standards of professional conduct and the code of ethics applicable to accounting practice and those related to limited assurance reviews issued by various professional accounting bodies, which are based on the fundamental principles of integrity, objectivity, professional competence and due care, confidentiality, and professional behavior.

The firm applies the International Standard on Quality Control (ISQC) 1, “Quality Control for Firms that Perform Audits and Reviews of Financial Statements, and Other Assurance and Related Services Engagements”, Consequently, our firm maintains a comprehensive system of quality control, including documented policies and procedures regarding compliance with ethical requirements, professional standards, and applicable legal and regulatory requirements.

### **Conclusion**

Based on the procedures performed and the evidence obtained, nothing has come to our attention that causes us to believe that the Greenhouse Gas Emissions Inventory for the period between January 1, 2024, and December 31, 2024, of Viña Concha y Toro S.A., has not been prepared, in all its material respects, in accordance with the GHG Protocol Standard and ISO Standard.

### **Other responsibilities**

- The preparation of the Greenhouse Gas Emissions Inventory period between January 1, 2024 and December 31, 2024, as well as its content, are the responsibility of the Company, which is also responsible for defining, adapting, and maintaining the management and internal control systems from which the information is obtained,
- Our responsibility is to issue an independent report based on the procedures applied in our review,
- This report has been prepared solely in the interest of the Company, in accordance with the terms set out in the Engagement Letter,
- The conclusions of the review are valid for the latest version of the 2024 Calculator, received on August 29, 2025.
- This letter is a translation of the Spanish version.

Sincerely,
