

This Redemption Statement has been produced for

VIÑA CONCHA Y TORO S.A.

by

CERO TRADE INC.

confirming the Redemption of

12 080.230000

I-REC Certificates, representing 12 080.230000 MWh of
electricity generated from renewable sources

This Statement relates to electricity consumption located at or in

**Av. Nueva Tajamar 481, Torre Norte, Piso 15, Las Condes, Santiago
Chile**

in respect of the reporting period

2025-01-01 to 2025-12-31

The stated Redemption Purpose is

**GHG Protocol Scope 2 (market-based) reporting, renewable electricity consumption claims and
sustainability disclosures**

Powered by
 **Cero Trade**

Redeemed Certificates

Production Device Details

Device	Country of Origin	Energy Source	Technology	Supported	Commissioning Date	Carbon (CO ₂ / MWh)
RUCATAYO	Chile	Hydro-electric	Run of river	No	2012-12-13	0.000000

Redeemed Certificates

From Certificate ID	To Certificate ID	Number of Certificates	Offset Attributes	Period of Production	Issuer
0000-0221-4954-7771.000000	0000-0221-4955-9851.229999	12 080.230000	Incl	2024-01-01 - 2024-11-30	SCX Santiago Climate Exchange

Auditor Notes

This statement is proof of the secure and unique redemption of the I-RECs stated above for the named beneficiary to be reported against consumption in the country during the reporting year stated. I-RECs are assigned to a beneficiary at redemption and cannot be further assigned to a third party. No other use of these I-RECs is valid under the I-REC Standard.

Where offset attributes are 'incl' the device registrant, who exclusively holds the environmental attribute rights, has undertaken never to release carbon offsets in association with these MWh; 'excl' means carbon offsets relating to these MWh may be traded independently at some point in the future.

Thermal plants emit carbon as part of the combustion process. While this is not zero carbon, it is generally recognised as carbon neutral where the source is recent biomass.

Esta declaración de redención ha sido preparada para

VIÑA CONCHA Y TORO S.A. – SECURITY DELTA

por

CERO TRADE INC.

confirmando la redención de

133.030000

Certificados I-REC, que representan 133.030000 MWh de
electricidad generada a partir de fuentes renovables

Esta declaración se refiere a la electricidad consumida en

**Av. Nueva Tajamar 481, Torre Norte, Piso 15, Las Condes, Santiago
Chile**

en el período informado

2025-01-01 a 2025-12-31

El propósito declarado es

**GHG Protocol Scope 2 (market-based) reporting, renewable electricity consumption claims and
sustainability disclosures**

Powered by

Certificados Redimidos

Dispositivo de Producción

Planta de Producción	Dominio de Origen	Fuente de Energía	Tecnología	Tipo de Apoyo	Fecha de Puesta en Marcha	Carbono (CO ₂ / MWh)
RUCATAYO	Chile	Hydro-electric	Run of river	No	2012-12-13	0.000000

Certificados Redimidos

Número inicial de Identificación de Certificados	Número final de Identificación de Certificados	Número de Certificados	Atributos de compensación	Período de Producción Desde/Hasta	Emisor
0000-0221-4956-7410.770000	0000-0221-4956-7543.799999	133.030000	Incl	2024-01-01 - 2024-11-30	SCX Santiago Climate Exchange

Notas del auditor

Esta declaración es prueba de la redención segura y única de los I-REC indicados anteriormente para que el beneficiario designado se informe sobre el consumo en el país durante el año de referencia indicado. Los I-REC se asignan a un beneficiario en el momento del canje y no se pueden asignar a un tercero. Ningún otro uso de estos I-REC es válido bajo el I-REC Standard.

Cuando los atributos de compensación son "incl", el registrante del dispositivo, que posee exclusivamente los derechos de los atributos ambientales, se ha comprometido a nunca liberar compensaciones de carbono en asociación con estos MWh; "excl" significa que las compensaciones de carbono relacionadas con estos MWh pueden negociarse independientemente en algún momento en el future.

En caso de discrepancia entre la versión en inglés y la traducción, prevalecerá la versión en inglés.

Auditor Notes

This statement is proof of the secure and unique redemption of the I-RECs stated above for the named beneficiary to be reported against consumption in the country during the reporting year stated. I-RECs are assigned to a beneficiary at redemption and cannot be further assigned to a third party. No other use of these I-RECs is valid under the I-REC Standard.

Where offset attributes are 'incl' the device registrant, who exclusively holds the environmental attribute rights, has undertaken never to release carbon offsets in association with these MWh; 'excl' means carbon offsets relating to these MWh may be traded independently at some point in the future.

Thermal plants emit carbon as part of the combustion process. While this is not zero carbon, it is generally recognised as carbon neutral where the source is recent biomass.

Where there is any inconsistency between the English version and the translation, the English version shall prevail.
